He received his training in prosthodontics from the LSU School of Dentistry and has also completed a fellowship emphasizing esthetic and implant dentistry at LSU.

LECTURE TITLE: "Comprehensive Esthetic Dentistry "

LECTURE SYNOPSIS:

With a conservative approach in mind, the restorative team should be able to provide patients with minimally invasive, highly esthetic, and long-lasting solutions. These solutions should take into consideration patient needs and desires, available materials, and clinical approaches. Novel conservative restorative techniques are able to combine a variety of treatment modalities for a large range of clinical situations. This presentation provides a systematic and scientific approach for selecting esthetic treatment modalities based on original research data with special emphasis on techniques and new materials design and selection.
