SCIENTIFIC PROGRAM

SATURDAY MORNING  
February 14, 1976

Regency Ballroom "A"

ESSAY PRESENTATIONS

8:00 Coffee and rolls

8:45 President's Welcome -  
Dr. Charles Ziegler, Acting President,  
Wauwatose, WI

9:00 Robert V. Walker, D.D.S., Professor and Chairman  
Division of Oral Surgery, University of Texas  
Health Science Center, Dallas, TX

"ORTHOGNATHIC SURGERY AS IT RELATES TO  
OCCLUSION AND RESTORATIVE DENTISTRY"

The latest advances in surgery of the maxilla and mandible as they relate to correction of dento-facial deformities will be presented. Specific emphasis will be given to the corrections afforded occlusion and how the corrections can significantly complement restorative dentistry and crown and bridge prosthodontics.

10:15 Val Jekkals, D.D.S., M.S.D., Professor and Chairman  
Department of Fixed Partial Prosthodontics, University of Illinois. Chicago, IL. Member of the American Prosthodontic Society

"PERIODONTAL PROTHESIS"

Exact technical procedures and the development of optimal functional occlusion are essential to successful restorative treatment. However, the periodontium must be considered if the entire stomognathic system is to survive. Therefore it is imperative that proper diagnosis and treatment of existing periodontal conditions be executed and that contours of the fixed prosthesis permit the maintenance of the supporting tissues by the patient and the dentist.

Robert E. Lee, D.D.S., Eau Claire, WI. Member of the American Academy of Restorative Dentistry and the American Prosthodontic Society.

"MUCOSTATICS"

When it becomes necessary to fabricate a partial or full denture, an understanding of MUCOSTATICS can be most helpful. A stable occlusion and a stable denture base are interdependent. A stable occlusion requires a base that must maintain what Dr. William Dykins refers to as "a tissue base constant." This presentation will discuss the principle of MUCOSTATICS and how the principle can be applied to practical cases in our everyday practice.

12:00 LUNCHEON - Regency "B"

5.

SATURDAY AFTERNOON  
February 14, 1976

1:30 Dr. Herman Corn, Levittown, PA, Professor of Periodontics, University of Pennsylvania, School of Medicine, Diplomate of the American Board of Periodontology

**"OSSEOUS CHANGES - EFFECT OF TOOTH MOVEMENT ON PERIODONTAL DEFECTS PRIOR TO RESTORATIVE DENTISTRY"**

Periodontal disease, a disease of the supporting structures of the teeth, has its reflective effect upon the attachment apparatus and frequently demonstrates damage at the alveolar crest. This is measured clinically as infra bony pockets. This presentation will direct its attention toward the restoration of the periodontium utilizing the control of the inflammatory lesion and tooth movement procedures to optimize tooth position and the repair of the attachment apparatus prior to restorative dentistry procedures.

2:30 Salvatore J. Chiappone, D.D.S., Niagara Falls, NY. Member of the American Equilibration Society and American Academy of Gnathologic Orthopedics.

**"OCCLUSAL HARMONY AFTER OCCLUSAL CORRECTIONS"**

Much controversy exists concerning equilibration techniques. Probably the two most basic philosophies are equilibrating centric relation first versus equilibrating centric relation last. The presentation will advocate the best from both. CENTRIC AND ECCENTRIC INTERFERENCES, RELATED TO THE OCCLUSAL DYSFUNCTION, CAN BE CORRECTED TOGETHER. However Mandibular movements must be read into each carbon marking so that each adjustment will have meaning, purpose, and direction in treatment. The technique supports coronal reshaping rather than spot grinding.

3:45 Frank V. Celenza, D.D.S., Manhasset, NY. President of Northeastern Gnathological Society, Associate Clinical Professor, Department of Removable Prosthodontics, New York University.

**"THE CENTRIC POSITION"**

This presentation will attempt to explain a concept of centric from a mechanical and physiological point of view. Where is it naturally? Where should we place it in treatment? Should it be different from orthodontic treatment, fixed restorative treatment and removable prosthesis? What should the character of Centric be? Should it be long, short, wide or what?

PROJECTED CLINIC PRESENTATIONS

SUNDAY MORNING  
February 15, 1976

Regency Ballroom "A"

8:00 Coffee and rolls

9:00 Donald G. Smith D.D.S., F.I.C.D., Coral Gables, FL. Chairman, Crown and Bridge and Inlay Section, Dade County Dental Research Clinic.

**"THE RELATOR METHOD OF ARTICULATION"**

A method of arranging gnathologically accepted principles and procedures so as to achieve a more accurate capture and replay of the corrected occlusion determining continuum of movement of the mandible for occlusal rehabilitation and for complete dentures.

9:30 Dr. Patrick M. Walker, Los Angeles, CA, Chairman, Department of Fixed Prosthodontics and Assistant Professor, Department of Occlusion and Morphology, University of Southern California.

**"WAXING AND RESTORING THE CLASS II OCCLUSION"**

Obtaining anterior disclusion, group function, cusp fossae relationships, and utilizing other disciplines for restorative purposes.

10:00 Harold Nemitz, D.D.S., F.A.C.D., Orange, CA, Associate Clinical Professor, Department of Graduate Prosthodontics, University of Southern California, Member of the Pacific Coast Society of Prosthodontists.

**"REVERSIBLE HYDROCOLLOID 1976"**

An unexcelled impression material. New improved material. New improved techniques. Backloading. Solid state electronic conditioners. Silicone separation.

10:30 Jan H.N. Pameijer, D.M.D., Amsterdam, The Netherlands, Associate Professor, Department of Prosthodontics, University of Amsterdam.

**"PERIODONTAL AND OCCLUSAL FACTORS IN CAST GOLD RESTORATIONS"**

Periodontal health, optimum Occlusion and Crown and Bridge procedures are inseparably interrelated. Three basic rules for obtaining and maintaining periodontal health will be discussed with special emphasis on tooth preparation and pontic design. A philosophy of establishing optimum occlusion will be presented stressing the importance of establishing occlusal morphology with the added wax technique.

11:00 Dr. William K. Solberg, Associate Professor and Chairman, Section of Gnathology and Occlusion, Head of the Temporomandibular Joint Clinic and Perioral Pain Clinic, UCLA, School of Dentistry, Los Angeles, California

and

6.

7.

Yoshio Yamaguchi, D.D.S., M.S., B.A., Lecturer, Department of Gnathology and Occlusion and the Department of Removable Prosthodontics. UCLA, School of Dentistry, Los Angeles, CA

**"PREPROSTHETIC DIAGNOSIS AND MANAGEMENT OF MANDIBULAR DYSFUNCTION"**

Occlusion-related pathosis appears in many forms which dentists should be able to recognize and treat. Unfortunately, the "one-cause-one-treatment" approach to problems arising in the temporomandibular joints has encouraged misconceptions and indifference among the profession at large. It is important to recognize that all of these patients will not get well. This perspective will stimulate the clinician to develop methods to detect and predict those patients who will respond to therapy and those who will continue to have what is essentially a chronic musculoskeletal problem. An organized analysis of these interlocking factors is warranted using a polytherapeutic approach.

12:00 LUNCHEON
