SCIENTIFIC PROGRAM

SATURDAY

February 4, 1956

Dining-room 2

✓ 9:00 a. m. REGISTRATION

9:30 a. m. BUSINESS SESSION

10:00 a. m. GEORGE H. MOULTON, B.A., D.D.S., Professor and Chairman, Crown and Bridge Department, School of Dentistry, Emory University, Atlanta, Georgia.
"Physiological Restoration"

This paper will stress the importance of the diagnosis of centric occlusion and restoring within the limitations of the physiological interocclusal space. Kodachrome slides will be shown demonstrating failures as a result of erroneous diagnosis and restoration.

11:00 a. m. ROBERT J. NELSEN, D.D.S., Research Associate, American Dental Association, National Bureau of Standards, Washington, D. C.

This presentation will cover the problem of cutting enamel and dentin in terms of mechanical-thermal, biological and patient response to the procedure. It will include a discussion of principles and methodology of tooth preparation and a description of the operation of the hydraulic turbine handpiece.

12:15 p. m. Luncheon (Dining-room No. 1)
Presentation by Dr. Dressel of Certificate honoring Dr. Arthur O. Klaffenbach.

2:00 p. m. J. RAYMOND GILL, D.D.S., Clinical Professor, Crown and Bridge Prosthesis, and Chairman of the Division, University of California, College of Dentistry, San Francisco, California.
"The Current Concepts of Dental Rehabilitation"

Since dental research has not yet provided the basis for preventive measures in controlling dental diseases, it is certain that treatment to conserve and maintain the functional efficiency of the oral mechanism will remain the objective of restorative dentistry for years to come. Such factors as diagnosis, treatment planning, operative skill and dental health education of the patient influence the value of this treatment. This presentation will deal primarily with providing adult dental health service by restorative procedures.

3:00 p. m. IRVING ABRAMSON, D.D.S., Assistant Professor, Endodontics, University of Maryland, School of Dentistry, Baltimore, Maryland
"The Role of Endodontics in Crown and Bridge Prosthesis"

The illustrated discussion will embrace the indications and contra-indications for root therapy; the endodontic treatment of individual roots of multi-rooted teeth to be used as abutments; and a consideration of strategic teeth in the dental arch. The apical amalgam filling of the root end under extensive restoration will be demonstrated, with emphasis placed on the manipulation of silver points in teeth receiving dowel retained crowns.

4:00 p.m. BUSINESS SESSION

SUNDAY MORNING

February 5, 1956

Dining-room No. 2

9:00 a.m. UNFINISHED BUSINESS or Announcements by Incoming President

10:00 a.m. RAYMOND M. CONTINO, D.D.S., Former Faculty Member of the University of Southern California, Los Angeles, California.

"Functional Diagnosis as It Pertains to Crown and Bridge and Restorative Dentistry"

This will include a discussion of the temporomandibular joint; location of the hinge axis; and the procedure of mounting models on an instrument capable of duplicating mandibular movements to ascertain what the teeth are doing and what will be required of restorations.

11:00 a.m. ERNEST B. NUTTALL, D.D.S., Professor, Fixed Partial Prosthesis, University of Maryland, School of Dentistry, Baltimore, Maryland.

"Preparation for the Anterior Porcelain Jacket Crown"

The application of the fundamental principles and orderly steps of instrumentation for the complete porcelain veneer crown preparation will be demonstrated by motion pictures. Emphasis will be placed on the procedures of establishing and completing the lingual shoulder.
